REPORT OF THE TRUSTEES.

CITY HOSPITAL, BOSTON, Dec. 31, 1886.

To the Honorable City Council:—

The Trustees of the City Hospital, in compliance with the Ordinances, respectfully present herewith their Annual Report:—

Number of patients remaining in the Hospital Dec. 31, 1886	322
--	-----

Admitted during the year:—

Medical	2,757
Surgical	2,202
Ophthalmic	87
	<u>5,046</u>

Treated during the year	5,368
Discharged	4,405
Died	603
	<u>5,008</u>

Remaining in Hospital Dec. 31, 1886	360
-------------------------------------	-----

Largest number in Hospital at any one time	391
Smallest number in Hospital at any one time	311
Daily average number of patients	344 +
Average length of stay of each patient (days)	23.39 +

Number of patients treated in the Out-patient Department, classified according to their diseases:—

Medical diseases	2,757
Surgical	5,474
Diseases of the Eye	1,693
“ “ Ear	404
“ “ Skin	910
“ of Women	412
“ “ Nervous System	455
“ “ the Throat	628
Total	<u>12,733</u>

Number of visits to the Hospital, classified according to diseases : —

Medical diseases	4,637
Surgical “	16,579
Diseases of the Eye	9,930
“ “ Ear	1,383
“ “ Skin	2,236
“ of Women	1,597
“ “ Nervous System	2,052
“ “ the Throat	2,156
Surgical out-patients treated at accident-room, and not elsewhere included	881
	<hr/>
	41,451

The report of the Superintendent and Resident Physician, presented herewith, contains, besides other information, a statement of the expenditures of the fiscal year, and is accompanied by the reports of the medical staff. These reports give in detail the number of patients treated in the Hospital, and the number treated in the out-patient departments during the year, with classified statements of their diseases and the results of treatment.

The whole number of patients in the Hospital during the year was 5,368, and they were under treatment an average of 23.39 days each, making a total of 125,557 days, or 17,936 weeks. The entire cost of maintaining the Hospital during the year was at the rate of \$9.88+ per week, \$177,306 27

Deducting from the above the amount received on
account of the board of paying patents . . . 32,407 57

Leaves, therefore, the sum of . . . \$144,898 70
as the cost to the city of treating the non-paying patients. But after further deducting stock on hand (extraordinary expenses, such as alterations and additions, complete renovations of old wards, new furniture and fixtures, etc., not included in the maintenance for this year), and averaging the net cost of maintaining the Hospital for the year, among all the patients treated, we find the *average cost to the city, for board of each patient, was \$7.52+ per week*, — which is twelve cents per week less than last year.

The report of the Superintendent explains in detail the expenditures made during the year in maintaining the Hospital.

The number of patients under treatment during the year was 5,368. This is a larger number than has been received in any single year, and is 25 per cent. more than five years

ago, 40 per cent. more than ten years ago, and nearly 60 per cent. more than fifteen years ago. A study of the table of admissions in the first page of the Superintendent's report is interesting, and shows the steady increase in the amount of work done by the Hospital.

During the past year the largest number of patients in the Hospital at any one time was 391; the smallest number at any one time, 311. The average length of stay was $23\frac{1}{2}$ days. During the year, 6,408 applicants were examined for admission; of these, 5,368 were admitted, and 1,040 were rejected. The various causes of rejection appear elsewhere.

The total expenditure of the Hospital year has been \$177,306.27, but by considering the larger average number of patients treated, the expenditures have shown a comparative saving *pro rata* of \$2,150. The average net cost per patient each week this year was \$7.52, against \$7.64 last year, and \$8.39 two years ago.

It is doubtful if a large metropolitan hospital devoted to acute diseases and surgery can maintain a high standard of service and preservation at a cost less than \$7.50 per week.

The income from paying patients this year has been \$32,407.57. This is much larger than usual and is the result of the policy adopted of collecting board on account of those not entitled to it by reason of non-residence, and also of requiring payments from those resident but able to pay. This subject was more fully explained in our report of last year, to which reference is here made.

The expenditures for the year include a continuance of the plan of repairs now going on for the last few years. There is only one ward that has not been thoroughly renovated and repaired, and this will undoubtedly receive proper attention during the coming year. During this year four wards have been vacated in turn and thoroughly renovated and repaired. The outside of the administration building has been repaired and painted. Pavilion III. has likewise been painted outside as well as in all its wards.

An extraordinary demand was made upon our annual appropriation for new boilers not previously estimated. Early in the year the battery of four low-pressure boilers used for heating purposes was condemned. As no special appropriation was obtainable, this was provided for from our annual appropriation for general expenses. The old boilers were removed and new ones put in under contract, by Messrs. Kendall & Roberts. The cost was \$2,389, and was a most satisfactory improvement. Much work has been done in the way of small repairs, necessary in a large group of buildings like ours. Much work remains to be done that has been

pressing for some time, but which the Trustees were unable to undertake for want of sufficient means.

The Nurses' Home continues to do all that was expected of it. It has proved a relief to the Hospital in separating the nurses from the sick. The health of the nurses has been better, and they have comforts not previously possible.

The two new wards intended for patients admitted with contagious diseases were begun in June, and have progressed very slowly. At present the walls are completed and the roofs on. The winter season now retards their progress, and it is not possible that they will be available during the present cold season, the time of year they are most needed. The construction of these new wards is not under the management of this department, but we would respectfully urge those intrusted with this responsibility to push forward the work to an early completion.

The money appropriated for the reconstruction and alteration of our out-patient departments has not yet been used. After several consultations between the Trustees, the Staff, and the Superintendent, it was decided that a one-story building, as first recommended, was entirely insufficient for the present, to say nothing of the future necessities of those departments. The plans for a building of two stories were made. This involved many unexpected alterations in order to conform to the new building laws: strengthening foundations and walls, and practically a demolition of the old building. Late in the season it was considered unadvisable to construct the building as first planned, and the appropriation was insufficient to build it as desired by the Medical and Surgical Staff. The Trustees finally decided to postpone the matter and to again petition for a further sum of \$16,000 (the amount deemed necessary by the City Architect), to construct a building fitted for the work.

We respectfully recommend to the Mayor and the City Council a further appropriation to meet our necessities.

The Trustees have given much time and thought during this year to petitions asking "that homœopathic treatment may be furnished at the City Hospital for those who prefer it." The Trustees gave hearings to both petitioners and remonstrants; and, by careful inquiries into facts, and a candid discussion of the question, every effort was made to arrive at a fair judicial decision.

The decision of the Trustees and their reasons were embodied in a special document of thirty-two pages entitled "Action of the Trustees of the Boston City Hospital upon the petitions for the introduction of homœopathic treatment," etc.

The Trustees unanimously determined that it was inadvisable to grant the petition.

Sundry other petitioners, at about the same time, made requests "that the students of the Boston University of Medicine may be allowed to visit the City Hospital for clinical purposes;" that "all clinical advantages and privileges of the Hospital be made equally available to all students pursuing the study of medicine in Boston;" "that the Trustees allow all medical students and physicians to visit the Hospital for purposes of medical study and observation, on equal terms and subject to the same conditions." The Trustees carefully reëxamined the rules and practice now existing at the City Hospital as to medical and surgical instruction; they also investigated personally and by letter the hospitals in other cities, and obtained the customs and practice relating to the subject in ninety-one American hospitals. The information obtained is believed to be accurate, coming from persons officially authorized to speak for their respective hospitals. The facts obtained were voluminous; and the treatment of the question, the statistics of other hospitals, the decision of the Trustees, and the amended rules, can be found in the printed document previously alluded to.

We quote from the document :

"The question of instruction to students has been considered, —

"1st. As to surgical operations and clinical instruction in the amphitheatre or other public room.

"2d. As to instruction in the wards or in the out-patient rooms.

"3d. As to the admission of female students to the various privileges.

"The large medical centres were visited and much information was obtained as to the practices prevailing there.

"Further and detailed facts were obtained by correspondences from all parts of the United States, and the results form an instructive collection of information on the question of the relation of hospitals to medical education.

On so important a decision, affecting the practice and welfare of both hospital and medical instruction, we deem it best to quote somewhat at length the decision as rendered by the Trustees through their Secretary : —

The present Trustees believe it their duty to continue to make the proper care and treatment of the sick and injured the main and controlling purpose of the Hospital, and to continue to permit medical instruction and observation in the Hospital only as incidental, and only so far as such instruction and observation can be afforded without detriment to the main purpose. While, as the Hospital is a city institution, they cannot

invite students of one school and debar those of another, they cannot assume to require of the Hospital staff, in addition to the duty of a careful attention to the patients, the giving of gratuitous instruction to medical students. Were they to impose the duty of free medical instruction upon the staff, the Trustees might properly be called upon to say further that the instruction should not be confined to one school of practice, but made to extend to the different schools in vogue in the city.

Being desirous, however, that the Hospital should afford to the citizens of Boston generally all incidental advantages in the way of medical knowledge which it is in the power of the Hospital to bestow, consistent with the welfare of the patients, the Trustees will gladly continue to offer the large amphitheatre to the staff not only for surgical operations or instruction, but will willingly extend these facilities to the medical department, requiring that in every case of introducing patients for instruction, the physician or surgeon in charge shall pronounce that the patient can undergo such examination and treatment without injury, and that the patient himself and the superintendent shall consent to the same.

This instruction in the amphitheatre has hitherto, as has been said, been open to all male students of medicine. The Trustees are now asked to extend the privilege of the amphitheatre to female students. The propriety of women practising as physicians or surgeons, and their comparative ability and fitness to pursue this profession, are not questions for the Trustees to consider in the official management of the Hospital; they must recognize the fact that women are becoming practitioners in all the schools of medicine; that they are admitted to the Massachusetts Medical and other State societies, and are recognized as such practitioners by the community at large; and that they are admitted in common with male students to other leading hospitals of the country. The Trustees therefore feel that there is no sufficient reason why women should not be admitted to the public instruction in the amphitheatre on the same terms as men, except as to certain operations from which a reasonable sense or regard for propriety may exclude them.

They have therefore determined that operations and instruction in the amphitheatre shall be open, upon reasonable regulations, to all students of medicine, of one year's standing, of duly incorporated colleges, with the proviso that the attending surgeon or physician may on any occasion reserve such cases as he deems improper for consideration in the presence of students of both sexes to the end of the lecture, and before proceeding with them require the withdrawal of all male or female students, as the case may be.

Such extension of the privileges of the Hospital in the direction indicated, if accepted by the staff, will, in the opinion of the Trustees, much increase its possible usefulness in the broader field of medical science and knowledge. The medical instruction which may thus be incidentally imparted by the members of the staff, who are of acknowledged eminence in their respective departments, will undoubtedly attract students from other institutions than those to which they are themselves attached, and of other schools of practice than those to which they themselves belong, but it will at the same time thus help to make this city more a centre for medical study and research, and help make the practice of its physicians, of whatever school they follow, more enlightened and beneficent. The staff, in thus adding to the general benefit conferred by the Hospital upon the community at large, would certainly not lessen the fame and prosperity of the particular institution especially receiving the benefit of their valuable medical knowledge and experience.

Clinical instruction in the wards must, from due regard to the many patients in various stages of disease, be limited, and conducted, if at all, with great care and circumspection. It would be manifestly detrimental to make it general, as in the amphitheatre; and in no great hospital in the country, even including those hospitals where medical instruction

would seem paramount to the care of the patient, are the wards so opened to all comers. On the other hand, to suffer members of the Visiting Staff specially to invite students or other physicians to accompany them in limited numbers on the Hospital visits — always subject to careful restrictions — would seem a proper return and courtesy which the Hospital can make to the staff for their arduous and gratuitous services. To compel them to make their daily visits free lectures to such medical students as might choose to attend, would, on the other hand, seem to impose an ungracious and uncalled burden upon the physician, and inflict a positive injury upon the patient, and to be contrary to the usage of every large hospital, so far as can be ascertained, in the country.

In accordance with the foregoing conclusions the Trustees have unanimously adopted the following rules, in place of those formerly existing upon the subject: —

Repeal Rules 158–159–160, and substitute therefor the following: —

No. 158. Members of the Surgical Visiting Staff may, on regularly appointed days, perform operations in the amphitheatre, and members of both the Medical and Surgical Visiting Staff may likewise give instruction there in their respective departments; and for the purposes of instruction they shall, subject to such restrictions as the Trustees may deem necessary, have the privilege of introducing patients, provided that in every case the attending surgeon or physician shall certify in writing that the patient may undergo such examination and treatment without detriment, and that the Superintendent and the patient consent thereto. Due notice of the nature of such operations or instruction shall, so far as practicable, be posted in the Lodge.

No. 159. When the amphitheatre is so opened for operations and instruction, physicians having received a degree of doctor of medicine, and students, of one year's standing, of any duly incorporated college or school of medicine or surgery, may be admitted in such numbers and on such regulations as the Trustees may from time to time determine. Whenever the operating surgeon or the physician shall deem a case improper for consideration, in the presence of students of both sexes, he may reserve such case for the close of his operation or lecture, and require the withdrawal of all male or female students, as the case may be. No female patient shall be taken into the amphitheatre without the attendance of a nurse (female), and no operation upon a female patient requiring the exposure of the genital organs shall be performed in the presence of male visiting students.

No. 160. Physicians and medical students accompanying, on his invitation, a member of the staff in his hospital visit or examinations, shall be limited to such numbers, not exceeding twenty, and shall conform to such regulations as the Trustees may from time to time determine, and shall further observe all such requests as to order and propriety as the attending physician or surgeon, or the Superintendent, may make.

No. 160A. The persons mentioned in the preceding rules shall be admitted only at the regular hours of operations, lectures, or visiting. Such persons shall, when required, show to the lodge-keeper cards of admission or of invitation issued in accordance with the above rules; and all cards or invitations so issued may at any time be revoked or suspended by the Trustees. All such tickets shall be forfeited if transferred to or used by persons other than those to whom they are issued. The Superintendent may, compel the withdrawal of any person who violates the regulations of the Trustees or good order, or refuses to conform to the requirements of the physician or surgeon in attendance, and he shall report all such violations, and all breaches of the rules, to the Trustees.

The decision of the Trustees was well received by the

public, the press, and also the various professional schools of medicine.

Thus far the new regulations have worked satisfactorily, with but little friction, and we trust further reconsideration of these subjects will not be demanded for some time to come.

In 1878 a change was made in the organization of the Medical Department by the establishment of a service for the treatment of Diseases of the Nervous System. This service has been of great benefit to hundreds of patients treated in its wards. With the growth of the Hospital the Nervous Service has remained about the same in its average number of patients under treatment. The other medical services have increased to such numbers as to be laborious for those intrusted with the responsibility, and too large to insure proper care to each individual patient. After much consideration it was thought best to change the services, and this was accomplished on the closing day of the year by abolishing the "North Medical," "South Medical," and "Nervous Services," and in their places were established the First, Second, and Third Medical Services. By this arrangement the numbers are more equally distributed, the creation of a fourth medical service was avoided, and the arrangement made more agreeable to the Visiting Physicians.

The Trustees record with regret that during the year the Hospital has met with a great loss in the death of Chas. D. Homans, M.D., Senior Visiting Surgeon. Dr. Homans was one of the originally appointed Visiting Surgeons, and continued his labors from 1864 to the present year. He was a skilful surgeon, a sympathetic friend to the sick poor, a steadfast friend of the Hospital, ever interested in its prosperity and zealous of its good name and high rank. His counsel was valued by his colleagues and by the Trustees, and the Hospital has suffered a great loss.

M. F. Gavin, M.D., Surgeon to Out-Patients, has been appointed one of the Visiting Surgeons, and H. W. Cushing, M.D., has been made Surgeon to Out-Patients.

F. W. Draper, M.D., much to the regret of the Trustees, has resigned as Visiting Physician, and Thomas M. Rotch, M.D., Physician to Out-Patients, has been elected Visiting Physician. The vacancy created by Dr. Rotch's promotion has been filled by the election of Charles F. Whittington, M.D.

R. T. Edes, M.D., Visiting Physician to Department for Diseases of the Nervous System, resigned early in the year, having removed to another city.

By the abolishment of the Department for Diseases of the

Nervous System, the Visiting Physicians to that service were transferred to the newly created Medical Service.

The Trustees recognize the great interest manifested by the Medical and Surgical Staff in all that concerns the Hospital.

The year has brought many unusual questions for solution, and the work incident to routine and emergencies has been great. The high standing and good repute of a hospital are largely owing to the labors and earnest endeavors of its professional staff, and the Trustees fully appreciate the value and extent of their services. The thanks of the Trustees are due the many friends of the Hospital, who have aided in various ways, bringing assistance to the management and comfort and consolation to the sick: to the clergymen and Hospital Visitors and Readers; to the Flower Mission; the Hospital Newspaper Society; the Christmas Card Mission; to the Boston Young Men's Christian Union, for carriage-drives, and to other charitable organized workers; to many known and unknown friends, for fruit, flowers, gifts, reading-matter, clothing, and money. All are gratefully appreciated, and deserve our cordial acknowledgments.

The work of the year has been greater than that of any previous year, and the thanks of the Trustees are due the Officers, the House Staff, nursing service, and employés, for the part of each in contributing to the good results.

To no one more than the Superintendent, Dr. Rowe, are the thanks of the Trustees due for the excellent management of the Hospital during the year.

For the Trustees,

T. J. DACEY,

President.

REPORT OF THE SUPERINTENDENT AND RESIDENT PHYSICIAN.

CITY HOSPITAL, Dec. 31, 1886.

To the Board of Trustees:—

GENTLEMEN,—I have the honor to present herewith my Annual Report of the Hospital for the year, January 1 to December 31, inclusive.

The following table shows the number of patients who have each year applied for admission, and been treated at the Hospital:—

	Patients examined for admission.	Patients admitted.	Patients accidentally injured.	Number of out-patients treated.
From June 1, 1864, to December 31, 1864.....	703	475	129	371
From January 1, 1865, to December 31, 1865.....	1,451	1,066	242	1,143
From January 1, 1866, to December 31, 1866.....	1,749	1,432	345	3,324
From January 1, 1867, to December 31, 1867.....	1,913	1,534	328	7,015
From January 1, 1868, to December 31, 1868.....	2,729	2,078	417	8,794
From January 1, 1869, to April 30, 1870.....	4,632	3,054	482	11,791
From May 1, 1870, to April 30, 1871.....	3,977	2,396	525	8,899
From May 1, 1871, to April 30, 1872.....	4,387	2,873	565	8,947
From May 1, 1872, to April 30, 1873.....	4,326	3,304	660	7,526
From May 1, 1873, to April 30, 1874.....	4,250	3,201	804	9,272
From May 1, 1874, to April 30, 1875.....	4,652	3,424	756	8,732
From May 1, 1875, to April 30, 1876.....	4,434	3,180	689	9,413
From May 1, 1876, to April 30, 1877.....	4,713	3,580	663	8,526
From May 1, 1877, to April 30, 1878.....	5,068	4,034	604	9,658
From May 1, 1878, to April 30, 1879.....	5,285	4,323	734	10,419
From May 1, 1879, to April 30, 1880.....	5,444	3,995	505	10,309
From May 1, 1880, to April 30, 1881.....	5,781	4,418	553	10,605
From May 1, 1881, to April 30, 1882.....	5,842	4,107	567	12,035
From May 1, 1882, to April 30, 1883.....	5,991	4,423	666	12,174
From May 1, 1883, to April 30, 1884.....	6,152	4,780	531	14,241
From May 1, 1884, to April 30, 1885.....	6,072	4,831	676	12,005
From May 1, 1885, to December 31, 1885.....	3,965	3,229	562	8,271
From January 1, 1886, to December 31, 1886.....	6,086	5,046	757	12,733
Totals	99,602	74,783	12,760	206,203

The foregoing statistics show that the total expenditure during the year has been \$177,306.27. This sum is reduced to \$165,021.65 by deducting from the total expenditure the cost of alterations and additions, renovating four wards, new appliances, etc., which are not chargeable to the current expenses of the Hospital. This amount includes every expenditure, and gives a cost of \$9.88 per week for each patient. If, however, we allow for the difference in stock at the beginning and close of the year, the income from paying patients, and the extraordinary expenses, etc., not chargeable to the maintenance for this year, we have as a *net cost* to the city of running the Hospital \$132,814.65, or *per capita* for each patient treated during the year \$7.52 per week. The income from paying patients has been \$32,407.57.

The largest number of patients on any one day was 391, against 365 last year; the smallest was 311, against 265 last year. The daily average was 344, which is 29 more than last year, and 58 more than two years ago. The average length of stay was $23\frac{3}{10}$ days.

The number of patients admitted with accidental injuries was 881. Of all patients admitted 221 died within 48 hours after admission. The rate of mortality was 11 per cent. If from the total number of deaths we deduct those brought to the Hospital in a dying condition, the annual mortality is reduced from 11 to 7 per cent.

The appropriation for this year will be barely enough to meet our wants, and many repairs contemplated must go over to another year. The amount asked for was reduced by \$10,000. Had the new buildings been occupied, as we had reason to expect, our appropriation would have failed. In addition, by the introduction of weekly payments, we are required to pay for thirteen months' salaries and wages instead of twelve.

The total expenditures for the period included in this report has been \$177,306.27. The average net cost per patient each week was \$7.52, against \$7.64 last year and \$8.39 two years ago. During the year 5,368 patients have been treated in the wards, 13,614 as out-patients, making a total of 18,982 who have received treatment in the various departments during the year. Of 6,086 persons examined for admission 1,040 have been rejected, which is proportionately less than last year. Of the number rejected nearly one-third were nominal applications, they being subsequently treated as out-patients and obtaining such benefits as seemed suited to their cases. Nearly one-third were unsuitable, being either wholly incurable or the victims of intemperance, providence, or malingeringers; of the remaining third only 62 were rejected

for want of room out of 6,086 applications. Of the 19 daily average of applicants, 2 were rejected and 17 admitted. The largest number admitted in any one month was 497, in July, and the smallest, 352 in January. In the Out-patient Departments 13,614 persons made 41,451 visits, which, distributed among the week-days of the year, made an average daily attendance of 133 out-patients. The largest attendance was 4,764 in the month of August, being a daily average of 183; the smallest was 2,246 in December, and the daily average was 83. In the nine departments for treating out-patients 17,460 visits, or 42 per cent. of the whole, were surgical. Nine thousand nine hundred and thirty visits, or 21 per cent., were to the Eye Department, and the remaining 37 per cent. were distributed among the various other services. The various Out-patient Departments are crowded and insufficient, and much benefit and comfort is anticipated on the completion of the reconstructed out-patient building.

The capacity of the wards remains the same as last year, 425 beds, and, with rare exceptions, has been found sufficient, except in the wards for contagious diseases. During the year the experiment has been made of removing one bed in each of four wards in order to utilize fireplaces heretofore disused. The experiment has proved very satisfactory, and we have derived all the well-recognized benefits coming from practical fireplaces in sick rooms; the enjoyment derived by patients has been great. When we obtain the additional beds from the new wards we shall next winter remove other beds from these wards, and utilize other disused fireplaces, hoping for still greater benefits. Our want of bed-space has heretofore prevented this comfort.

During the summer season the tent-service has been used, as in previous seasons, for the most serious surgical cases. Its maintenance, when once established, is comparatively inexpensive. It is the testimony of all interested in hospital sanitation that tents afford surgical resources not obtainable in a permanent hospital ward, and our experience is, that when elective, they are chosen alike by surgeons, patients, and the nursing service. The space acquired by our fifty-six beds in tents enables us to vacate in turn the permanent wards, for sanitary renovation. During the past year six wards were vacated and four were renovated throughout; every inch of surface being subjected to paint or other suitable treatment. Wards P, T, K, and L, were thus treated, affording opportunity to make many small but useful changes always suggesting themselves, but not always easy to accomplish in a ward full of sick patients.

The exterior of the Central administrative building has

been painted, and received the general repairs so long needed. During the summer season much painting and general repairs has been done in a large number of places. The thirteen buildings comprising the hospital group are (excepting the Lodge) in a better condition as to appearance and repair than at any time since they were built.

Early in the season it was found, as might have been anticipated, that our battery of four low-pressure boilers, used solely for heating purposes for sixteen years, were unsafe, and they were condemned. New boilers replaced the old, and during the winter season we have been able to keep our numerous buildings in a more comfortable condition, with a greater frequency of change of air than for several years past. At times, however, during low temperature, with a high wind velocity, we have had some difficulty in keeping the wards up to a standard of sixty-eight degrees. It is doubtful if we shall be able to properly warm our new wards without additional boilers, and the subject is here suggested for your consideration.

Since the growth of the Hospital from 325 to 425 beds there has been an increased demand for labor and general supplies. The apparatus and space in kitchens, laundry, and service-rooms generally have reached their full capacity for work by comfortable methods. The heating apparatus is at its limit; the water-supply has been enlarged; the Lodge has long since outgrown its capacity to conveniently accommodate the throngs of visitors who come in visiting hours; the greenhouses have been crowded into the shade, and the airing spaces are less than would be desirable. During the tenting season the entire grounds are utilized to their fullest extent, and radical and costly changes will be required on the addition of more buildings. The space but a few years ago considered ample for many years to come is already in active use. The vacant East Chester park lot, now in your jurisdiction, affords room for isolating buildings, but there will have to be maintained a separate annex dependent upon their own resources for heat, kitchens, and other necessary adjuncts. This lot, placed under your care in 1883, cannot be used to advantage unless the land at the corner of Albany street and East Chester park is acquired, East Springfield street closed, and the block of land made a common part of our present occupied grounds. Such acquisition has been previously recommended, and is respectfully referred for your consideration.

The Training School for Nurses is now at the close of its ninth year. The following is a summary of the changes: At the beginning of the year there were seventy nurses. During the year twenty-nine pupils have been graduated; of

these five were retained as head-nurses ; four graduate head-nurses have resigned ; six pupils have been allowed to resign on account of impaired health and strength ; two have died, and one was discharged for cause.

One graduate, five former pupils, and thirty-eight probationers have joined the school, leaving seventy, — the same number of nurses as at the beginning of the year. The Superintendent of Nurses, the Assistant Superintendent, the Night Supervisor, and nine head-nurses are graduates ; there are also fifty assistants nurses and four probationers.

The Superintendent of Nurses and her assistant, have given 259 formal class recitations in the manuals and text-books, and there have been 101 classes in *massage*. The Senior nurses have in classes aggregated 196 lessons in sick cookery at the Boston Cooking-school.

The following lectures have been given to the whole school by the Medical and Surgical Staff : —

Six by Dr. Gay ; surgical dressings, bandaging, etc. ;

Two by Dr. Doe ; nursing in the lying-in room ;

Two by Dr. C. M. Green ; physiology of pregnancy and labor ;

Two by Dr. Lyman ; nursing in gynæcological cases ;

Two by Dr. Mason ; nursing in fevers ;

Two by Dr. Greenleaf ; medicines : their kinds, administration, etc. ;

Two by Dr. Tilden ; diseases of skin and syphilis in adults and infants ;

One by Dr. Cheever ; before and after surgical operations ;

One by Dr. J. O. Green ; the ear, its diseases and care ;

One by Dr. Wadsworth ; the eye, care and nursing ;

One by Dr. Watson ; antiseptic dressings ;

One by Dr. Folsom ; the insane and their nursing ;

One by Dr. Shattuck ; epidemic diseases and disinfection ;

One by Dr. Rotch ; children, their care in health and disease ;

One by Dr. Burrell ; surgical emergencies ;

One by Dr. Buckingham ; nursing in tracheotomy ;

Making a total of 27 lectures during the lecture months of the year.

The Training School, which for several years was a matter of experiment, and which required constant adjustment and many changes, is now so thoroughly matured in its methods, and has become such an integral part of the organization, that its course is not marked by events that previously have attracted attention in our hospital life.

The school year has been one of evenness and excellence ; no special event has occurred to mar its course, and the bene

fits accruing to the welfare of the sick — always the primary object of the Hospital — have been great and happily satisfactory.

In conclusion, I cannot refrain from congratulating the Trustees on the excellent general condition of the Hospital; the good character of its service; the loyal and zealous spirit that generally prevails, and the favorable and beneficial results of the year's work.

Our organization is large and complex, with practically a household of more than 600 people under one roof, whose work is one requiring unceasing and vigilant industry and pains on the part of all workers, and often not free from harassing and anxious care and strain. That such an arrangement should work together for the good of those intrusted to your care, without visible friction, any untoward event or calamity, is a happy outcome of the year's work.

The friends of the Hospital — the clergy, the Hospital visitors and readers, the societies, and individuals who have each in their way contributed by little or much — are all entitled to a cordial acknowledgment of their kindness to the sick, to whom their attentions are always grateful. Generous gifts of flowers, fruit, books, reading-matter, toys, and clothing and numerous things, have been sent us.

My official thanks are due to my officers, who have assisted me in accomplishing the good work of the year.

The nurses and employés have, as a rule, been earnest and faithful in their part of the service, and are entitled to commendation.

I desire to acknowledge my obligations to the members of the Medical and Surgical Staff, for their advice and support.

In presenting this, my eighth annual report, to the Trustees, I wish to express my cordial thanks for many evidences of confidence and trust received during the year, and to acknowledge with gratitude their hearty support and indulgence.

I have the honor to be

Your obedient servant,

G. H. M. ROWE,

Superintendent and Resident Physician.

BEQUESTS.

GOODNOW FUND. — ELISHA GOODNOW, of South Boston, who died the year 1851, and whose will is dated July 12, 1849, bequeathed to the city "all the rest and residue of his estate, real and personal, not otherwise disposed of" for the purpose of establishing, in the Eleventh or Twelfth Wards of the city, a Hospital for the sick; one-half of said funds to be applied for the establishment and maintenance of free beds, which should always be at the disposal and under the control of the Officers of the Government of said Hospital for the time being. Under this will the city came into possession of certain real estate situated on Cross street, which has been disposed of, and has produced the sum of \$16,500, which has been invested in City of Boston Six per cent. Stock. Also a lot of land on Third street, South Boston, containing 6,683½ feet, which was disposed of in 1867 for \$4,623.25, of which \$4,000 has been invested in City of Boston Five per cent. Stock, and the balance (\$633.25) remained in the City Treasury at interest until it amounted to \$1,000, and was invested in a City of Boston Six per cent. Currency Note, The \$10,000 deposited by the Executors of Mr. Goodnow, June 22, 1852, with the Massachusetts Hospital Life Insurance Company, the interest upon which is to be paid to the widow, will, upon her decease, be distributed as follows: —

\$500 to the Penitent Females' Refuge.

\$5,000 to City of Boston; income to be expended for the relief of sick and infirm persons.

\$4,500 to be added to the fund heretofore provided for the support of free beds in the City Hospital.

NICHOLS FUND. — LAWRENCE NICHOLS, who died in September, 1862, made the following bequest to the city: "I give to the City of Boston, towards the establishment and endowment of a City Hospital, in case such Hospital shall have been established at the time of my decease, the sum of one thousand dollars." And in case such Hospital should not have been established by the city at the time of his decease, he directed the same amount to be deposited with the Massachusetts Hospital Life Insurance Company, and suffered to accumulate, by the addition of interest, until such a Hospital should be established.

The executor of the will, Wm. Perkins, Esq., has paid into the treasury nine hundred and thirty-seven dollars and

twenty-five cents (\$937.25), being the amount devised, less the *Internal Revenue Tax* on the same, and \$530.50 as one of the "*residuary legatees in the United States*," from the surplus remaining undisposed of. The \$937.25, with the accumulated interest thereon, has been invested in a certificate of City Stock for \$1,000. The balance (\$530.50) remained at interest until it amounted to \$1,000, and was invested in a City of Boston Six per cent. Currency Note.

NORCROSS FUND. — 1868, January 1. The trustees received the sum of two thousand dollars from Hon. OTIS NORCROSS, as the foundation of a fund for the benefit of patients leaving the Hospital poor and destitute of proper clothing. The principal sum is invested in a City of Boston interest-bearing note, to be deposited with the City Auditor, the interest of which is to be collected annually or oftener, and paid over to the President of the Board of Trustees, for the time being, of the City Hospital, to be by him expended at his discretion for the benefit and temporary assistance of those patients who are in his judgment deserving, and who are destitute of proper clothing in which to leave the Hospital, and having no means of procuring it.

	<u>\$34,000</u>

The Ordinance in relation to the City Hospital, Ordinances of 1876, Sect. 9, page 433, provides that said scrip shall be deposited with the Auditor of Accounts, who shall receive the interest as the same shall become due thereon, and add it to the moneys which shall have been appropriated for the use of the Hospital.

HOUSE RULES;

WITH RULES FOR ADMISSION AND DISCHARGES AND GOVERNMENT OF PATIENTS; ALSO RULES FOR VISITORS.

HOUSE RULES.

All employés shall be in their respective places during the hours of duty.

The doors and gates of the Hospital will be closed at 10 o'clock P.M., at which time all inmates shall be quiet, and all not on duty shall be in their rooms.

A record shall be kept of all persons entering the Hospital between the hours of 10 P.M. and 7.30 A.M.

No employés shall be absent from the Hospital, except as permitted by special rules or by the Superintendent.

The use of tobacco, wine, and intoxicating liquors is prohibited within the Hospital, unless prescribed by a Physician or Surgeon.

All profane and obscene language, loud talking, and incivility are prohibited.

All employés shall observe such further rules and directions for their conduct as may from time to time be established.

ADMISSION OF PATIENTS.

Applications for admission of patients may be made at the Hospital on each day of the week, Sunday excepted, between 9 and 12 o'clock A.M.

Whenever able the patient shall apply in person. When not able to appear in person, on application made by a friend, the patient may be visited at his residence.

Any Trustee, or either of the Physicians or Surgeons in attendance, may, in case of emergency, send a patient in the first instance to the Hospital by written permit.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Permits for admission shall be subject to the approval of the Visiting Committee, and the Committee shall, except as above, have power at any time to require the Superintendent to report to them the names of applicants before admitting them, and may dismiss any patient whom they think improperly admitted, or change the terms of admission.

Patients may be admitted by the Trustees to the privileges of the Hospital at such rates of board as the Trustees may,

from time to time determine, payment for such board being secured by the friends of the patients or by the authorities of the city or town to which the patients belong.

Whenever, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or a part of the board shall be paid. If separate apartments, or articles not usually furnished at the Hospital, are provided, such payment shall be made therefor as the Trustees shall deem reasonable.

No person having acute venereal disease, or alcoholism, shall be admitted except as a paying patient.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms, which are deemed capable of being relieved.

DISCHARGE OF PATIENT.

Patients shall be discharged by the Superintendent as before provided.

Patients discharged on the recommendation of the Physicians or Surgeons shall be provided with a certificate, stating their condition at the time of discharge, whether cured, relieved, or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the Hospital without the approval of the Superintendent, a written statement to that effect shall be required from any person assuming the responsibility of the removal.

In case of the decease of a patient the Superintendent shall sign the death-certificate. He shall also state the time and cause of death, the disposition made of the body, whether delivered to friends or buried from the Hospital, in which latter case he shall mention the place of interment.

The body of any person dying at the Hospital shall not be delivered without a written receipt from the parties taking the same.

GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all the rules of the Hospital.

Patients shall be in their proper places in the wards during the visit of the Physicians and Surgeons, and always by 7.30 o'clock P.M., unless specially excused by the Superintendent.

Such free patients as are able shall assist in nursing, and in such other services as may be reasonably required of them.

No patient shall leave the Hospital grounds without a pass from the Superintendent, nor his ward, without the consent of the nurse in charge.

No patient shall purchase, or cause to be purchased for him, any article of food whatsoever, nor any other article, without the consent of the Superintendent.

Profane and obscene language, loud talking, and incivility are prohibited.

Patients may be visited by clergymen of their own selection, and any wish for the performance of any particular religious rite shall be indulged when practicable.

Complaints, for whatever cause, may be made to the Superintendent or Visiting Committee, and when reasonable shall be by them reported to the Trustees.

VISITORS.

No person shall visit any part of the premises, except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent, or of some one of the Trustees.

On Monday, Tuesday, Thursday, and Saturday of each week, from 2 to 3 o'clock P.M., friends may be permitted to visit patients, though no patient shall receive more than two visitors on the same day. In all cases, however, the Trustees or Superintendent may exercise discretionary powers as to excluding or admitting visitors.

All visitors shall leave the Hospital when the bell rings at the expiration of the visiting hour.

No visitor shall take any meal in the Hospital, or pass the night therein, without permission from the Superintendent or one of the Trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to a patient shall be left with the Superintendent.

THE BOSTON CITY HOSPITAL TRAINING-SCHOOL FOR NURSES.

The Trustees of the Boston City Hospital are prepared to give a two years' course of training to women desirous of becoming professional nurses.

Those wishing to receive such a course of instruction must apply to the Superintendent of the City Hospital, Boston.

The most desirable age for candidates is from twenty-three to thirty-five years; they must be in sound health, and must send with their application a certificate from two responsible persons (one a physician) as to their good character and good health. Upon the recommendation of the Superintendent of the Hospital, and the approval of the Trustees, they will be received for one month on probation. During this month they are boarded and lodged, and have their laundry work done at the Hospital, but receive no compensation.

The Superintendent of Nurses has charge of the Training-School, under the authority of the Superintendent of the Hospital and of the Board of Trustees, and the nurses are subject to the rules of the Hospital. Their fitness for the work, and the propriety of retaining or dismissing them at the end of the month of trial, are determined by the authorities in charge of the school, under the direction of the Trustees; and the same authorities can, in like manner, discharge them at any time, in case of misconduct or inefficiency. They reside in the Hospital, and serve as assistant nurses in its wards.

All nurses are required to be sober, honest, truthful, trustworthy, punctual, quiet, orderly, cleanly, neat, patient, kind, and cheerful.

COURSE OF TRAINING.

Those fulfilling the conditions of the probationary month are accepted as pupils. They must sign a written agreement to remain at school for two years, and to conform to the rules.

The instruction includes : —

1. The dressing of blisters, burns, sores, and wounds, and preparation and applying of fomentations, poultices, and minor dressings.

2. Cupping, leeching, and subsequent treatment.

3. The administering of enemas, and use of the female catheter.

4. The applying of friction to the body and extremities in the best method.

5. The management of helpless patients in bed in moving, changing bed and body linen, giving baths, keeping patients warm or cool, prevention and dressing bed-sores, managing position, etc., and in feeding.

6. The making of bandages, and rollers, preparation of splints, etc., and bandaging.

7. The making of beds and changing sheets, etc., with patients in bed.

8. The cooking, preparing, and serving of food and delicacies for the sick.

They are also given some instruction in the best practical methods of supplying fresh air, warming and ventilating sick-rooms in a proper manner, and are taught to take proper care of rooms and wards; in keeping all utensils perfectly clean and disinfected, etc.; to observe the sick accurately in regard to the state of the secretions, expectorations, pulse, breathing, skin, temperature, eruptions, sleep, mental condition as to delirium, stupor, etc., condition of wounds, appetite, effect of diet or of stimulants and medicine, and the managing of convalescents.

The instruction is given mainly by the Superintendent of the Training-School and by the head nurses. Lectures, recitations, and demonstrations also take place at stated periods by the Hospital staff and House Officers. Examinations, chiefly upon practical points, will take place from time to time.

The pupils are employed as assistant nurses in the wards of the Hospital, and are paid ten dollars (\$10) per month during the first year, and fourteen dollars (\$14) per month during the second year, for their clothing and personal expenses. This sum is in nowise intended as wages, it being considered that their education during this time is a full equivalent for their services.

They are required to wear at all times, while on duty in the wards, the Training-School uniform dress.

When the full term of two years is completed, the nurses thus trained receive (after final examinations) diplomas certifying to the regular course of training, their knowledge of nursing, and their ability.

The right is reserved to terminate the connection of any nurse or pupil with the school for any reason which may be deemed sufficient.

A blank form will be furnished to applicants to be filled in

with answers to the following questions in the candidate's own handwriting, and sent to the *Superintendent of City Hospital, Boston, Mass.*

QUESTIONS TO BE ANSWERED BY CANDIDATE.

1. Christian name in full.
2. Are you a single woman or widow?
3. Your present occupation or employment.
4. Age last birthday, and date and place of birth.
5. Height. Weight.
6. In what school or schools educated, and in what place?
7. Are you strong and healthy? Have you always been so?
8. Are your sight and hearing perfect?
9. Have you any physical defects?
10. Have you any tendency to pulmonary complaint?
11. If a widow, have you children? How many? Their ages? How are they provided for?
12. Are you otherwise free from domestic responsibility, so that you are not liable to be called away?
13. Where (if any) was your last situation? How long were you in it?
14. The names in full and addresses of two persons not of your own kindred to be referred to. State how long each has known you. If previously employed, one of these must be the last employer.

Having read and clearly understanding the foregoing conditions and regulations, I declare the above statement to be correct.

Signed,

Candidate.

Date.

Present Address.

DONATIONS.

During the Hospital year 1885-86 the following donations to the Hospital have been received : —

- From Mr. KEER, King's Chapel, hawthorn, apple, and cherry blossoms.
- From H. BROWN, Lowell, wild flowers.
- From Miss L. J. BLANCHARD, Medford, books, magazines, etc.
- From Miss TENNY, flowers, twice.
- From A FRIEND, 88 presents for the children.
- From Mrs. BRIGHAM, flowers.
- From Miss DUFF, 7 paper dolls, and card album for the children.
- From Dr. C. D. HOMANS, a large number of toys for the children's ward.
- From FIRST UNITARIAN CHURCH, flowers.
- From Miss STACKPOLE, knitting-wool for the children.
- From S. HOMANS, cards for the children.
- From DWIGHT SCHOOL BOYS, large bag of marbles for the children.
- From Mrs. WM. H. LEAVELL, golden rod for the children.
- From FRANK HYDE, sweet-pea blossoms.
- From Miss BRACKET, asters.
- From Rev. Mrs. MERIDITH, Mt. Vernon, N.H., flowers.
- From Miss BIRD, flowers, fruit, books, and toys.
- From Mrs. N. R. HUNT, Secretary W.C.T.U., South Sudbury, Mass., flowers, cards, and scrap-book for children.
- From FLOWER AND FRUIT MISSION, many visits and large quantities of flowers, nosegays, fruit, etc., etc.
- From LADIES OF BEN STONE POST, G.A.R., by Mrs. CODMAN, quilt for Ward O.
- From Miss AUNRÜD, books, magazines, etc.
- From E. L. SMITH, flowers.
- From Miss MASON, many presents for the patients, on Christmas.
- From HOSPITAL NEWSPAPER SOCIETY, 650 Christmas cards.
- From CARD MISSION, by Rev. Mr. WALDRON, Xmas cards and letters.
- From A FRIEND, 50 cards.
- From Miss GOVE, 47 cards and Christmas souvenirs.
- From LILLIAN SHUMAN, 6 dozen juvenile picture-books on Christmas.
- From Miss ETHEL KITTRIDGE, 44 presents for the children.
- From A NURSE, 20 presents for the children.
- From Miss MACY, many presents for the children.
- From YOUNG LADIES OF BOYLSTON CHURCH, Jamaica Plain, 14 scrap-books.
- From Miss REED, 2 card albums, and 2 scrap-books.
- From Miss BEANE, variety of gifts for the children.
- From Dr. WOODWARD, \$2 to buy presents for the children.
- From A FRIEND, Youth's Companion, subscription for one year.
- From MAUD E. OTIS, Kennebunk Maine, arbutus for children.
- From FIRST CHURCH, Easter Sunday, flowers and floral crown.
- From SCHOOL CHILDREN (Miss E. M. HOLDEN's), Pawtucket Falls, Lowell, flowers for children.
- From Mr. MITCHELL, Charles-river Village, flowers.
- From Mr. HOWE, Dedham, flowers.
- From CHURCH OF UNITY, flowers.
- From Miss MORRIS, \$16.27 worth of things for convalescent patients.
- From Mt. PLEASANT UNITARIAN CHURCH, flowers.
- From Miss S. LANE, flowers.
- From METHODIST CHURCH, Auburndale, flowers.
- From Mrs. T. A. WATSON, Weymouth, flowers.
- From Mrs. MARSH, flowers.
- From Mrs. OLIVE BAMPTON, 3 dozen palm-leaf fans.

- From A FRIEND, 3 dressing-sacques.
 From MRS. GEORGE DICKENSON, flowers.
 From WINTHROP KINDERGARTEN, 2 scrap-books.
 From BERKELEY-ST. CHURCH, flowers.
 From BOSTON YOUNG MEN'S CHRISTIAN UNION, carriage-drives for 247 patients.
 From HENRY A. GREEN, Esq., books, magazines, and papers.
 From H. W. SWIFT, illustrated papers and magazines.

EXTRAS. — In addition to the above, the following extras may be ordered by the Visiting Physicians and Surgeons: — Milk, Beef Tea, Chicken Broth, Mutton Broth, Gruel, Oatmeal Mush, Corn Starch, Boiled Rice, Eggs, Beef Steak, Mutton Chop, and Chicken.

A small allowance of Milk and Beef Tea will be provided for each ward daily. The House Physician or Surgeon may order these articles by a signed special order, in each case when needed, for patients who enter in the intervals between the regular visits of the Visiting Physician and Surgeon to whom the case is assigned.

All Wines and Liquors, Ale, Beer, etc., will be ordered by the Visiting Physicians and Surgeons only, excepting in emergencies, when special orders for the same may be given by the House Physician or Surgeon, to be afterwards approved by the Visiting Physician or Surgeon, as the case may be.

By Order of the Board of Trustees.

JULY 2, 1878.

(Mar., 1887, 20,000)

BOSTON PUBLIC LIBRARY.

One volume allowed at a time, and obtained only by card; to be kept 14 days (or seven days in the case of fiction and juvenile books published within one year) without fine; not to be renewed; to be reclaimed by messenger after 21 days, who will collect 20 cents besides fine of 2 cents a day, including Sundays and holidays; not to be lent out of the borrower's household, and not to be transferred; to be returned at this Hall.

Borrowers finding this book mutilated or unwarrantably defaced, are expected to report it; and also any undue delay in the delivery of books.

*.*No claim can be established because of the failure of any notice, to or from the Library, through the mail.

The record below must not be made or altered by borrower.
